Castronero, Johanna,	Registered	Signed	Care	04/01/16 1058
RN	Nurse		Management	

Met with [REDACTED] and his son at bedside. Reviewed CHF education materials(CHF calendar, what is heart failure, heart failure warning signs and symptoms, heart failure maintenance guidelines, why should I limit sodium, sodium tracker and understanding nutrition labels). Pt reports checking his weight daily, taking his medications as prescribed and following up with his doctors. Pt has multiple DME at home: wheelchair, cane, rolling walker, home O2 and a nebulizer. Pt's son is monitoring nutrition facts for sodium content. Encouraged son and Pt to increase their efforts with sodium vigilance. Pt is agreeable to post discharge follow up call. JC x 6935
